## **Proposed Wind Farm – 18 Wind Turbines, 125m high at Middle Moor Alnwick**

The issue was discussed at a recent Parish Council meeting. Denwick Parish Council has written already to Alnwick District Council requesting a full discussion on the subject of the wind farms, and is in support of the opposition to the project and the campaign S>A>N>E> (save Northumberland's Environment)

Denwick Parish Council wish to object to the wind farms and believe that for such an important issue to the community there should be full discussions and research before committing to the project.

The following points should be considered:

- \* The size and position of the turbines would have a massive detrimental impact on the landscape
- \* This would be a vast change to the appearance of the historic area of outstanding natural beauty, with potential for damage to natural fauna and flora.
- \* It would be harmful to the tourism and local economy which relies on the peaceful settings and beautiful landscapes of the historic parks and gardens.

Yours sincerely

SC Haughie  
Clerk to Denwick Parish Council
