

KYLOE PARISH COUNCIL

OUTLINE STATEMENT

In respect of the Public Inquiry , Middle Moor, North Charlton, by Npower,

The Council maintains:

That the size and extent of the windfarm would dominate the landscape and far exceed its capacity to absorb change.

That the visual impact would have a detrimental effect on the views from the Heritage Coast AONB and on the unspoilt and tranquil countryside..

That there will be a damaging impact on tourism in the county which will harm the broader economy.

The Council is aware of the widespread and strongly felt opposition to the siting of wind turbines in this beautiful unspoilt part of Northumberland and supports the campaign of SANE (Save Northumberland's Environment).

We would request that the Inspector recommends that this development is not permitted to proceed.

The Chairman, Kyloe Parish Council.
